L10046575A/L\ IS NOT A VALID SAVED NAME

Enter the name you wish to use for the saved query,
answer set, or L-number list. The name must:

1. Begin with a letter,
2. Have 1-12 characters,
3. Contain only letters (A-Z) and numbers (0-9),
4. End with /Q for a query (search profile,
structure, or screen set), /A for an answer
set, or /L for an L-number list.

5. Not already be in use as a saved name,
 6. Not be END, SAV, SAVE, SAVED
 7. Not have the form of an L-number (Lnnn).

L23 ANSWER 5 OF 8 USPATFULL on STN

AB The present invention provides for a composition containing a pharmacologically active agent and a selected imidazole or an imidazole derivative, such composition exhibiting enhanced penetration of the pharmacologically active agent component when a composition containing the aforementioned components is applied to skin.

A method of enhancing dermal penetration of compositions containing a pharmacologically active agent is also provided.

PI US 5164406 19921117

L23 ANSWER 6 OF 8 USPATFULL on STN

AB Topical compositions are described which contain a vehicle which is free of lower alkanols, a pharmacologically active agent whose dermal penetration can be enhanced and a unique penetration control system. The control system contains an imidazole penetration enhancer and either propylene glycol alone or propylene glycol with an isopropyl ester of a fatty acid.

PI US 5087620 19920211

19950221

L23 ANSWER 3 OF 8 USPATFULL on STN

AB Topically administerable compositions are described which contain, in a pharmaceutically acceptable vehicle, a combination of a drug whose dermal penetration can be enhanced and a combination of substances, which combination enhances and controls the penetration of the compositions through the skin. The combination contains an antifungal amount of an imidazole and a certain amount of either propylene glycol, specified fatty acid ester(s) or a mixture of propylene glycol and specified fatty acid ester(s).

PI US 5374633

19941220

L23 ANSWER 4 OF 8 USPATFULL on STN

AB A gel formulation for topical administration with enhanced skin penetration properties comprising a therapeutically effective amount of an imidazole antifungal agent, either by itself or in combination with a steroid anti-inflammatory agent, in a vehicle system that includes lauryl alcohol is disclosed.

PI US 5219877
